## ✚ summary

Prior experience includes 2+ years in frontend development working on responsive maintenance and content management. In addition, 4+ years in accounts receivable providing excellent customer service and managing numerous accounts has taught me communication and management skills to succeed on a collaborative team.

## ✚ projects

### Alpaca Vids                                             Jan. 2020 to Mar. 2020
React | Redux | Node | Express | Jest | SQL | Knex | Sass

A video journal web application that allow users to practice answering prompt questions by recording themselves answering those questions and receiving feedback from their team members on one platform. Worked with a remote team of 4 full-stack developers and 1 UX designer over 2 months.

- Functioned as a full-stack developer
- Created several API endpoints, a protective middleware,  and tests for those endpoints on the backend using jest, node, express and knex
- Worked with Postgres relational database
- Created responsive base layout with Sass
- Created actions in redux, dispatching data from endpoints to display on the frontend
- Implemented CRUD operations

### Recipe App                                             Jan. 2020 to Current
React | Redux | Node | Express | Sass | SQL | ReactStrap | Formik

Recipe application to save and store users can save and manage favorite recipes in one convenient place.

- Developed both frontend and backend
- Worked with knex SQLite3 queries for database management
- Created responsive layout with Sass and ReactStrap
- Implemented CRUD operations
- Created several API endpoints on the backend using express, node, and knex
- Implement state management with React and Redux

### Random Quote Machine                                   Feb. 2020 to Feb. 2020
React | Sass | Axios

Simple react application that displays randomly generated quotes
- Developed responsive frontend with Sass
- Use of semantic HTML structure
- Made use of axios promise based HTTP client to make calls to third party API
- Implemented use of react class components
